About Me

I am a Python Developer specializing in Backend development. I have always had a passion for technology and always saw my future in the field of its development. I started my development career in the spring of 2022. I love developing the server side of applications, working with APIs, databases. I always try to keep abreast of all the trends in backend development and technology.

Experience

April 2023

Backend Developer

He participated in the IT hackathon IT Revolution 23, where he and his team developed a real estate management platform.

June 2023 - now

Backend Developer

I work as a Backend Developer at the non-profit organization Baza Trainee Ukraine, where I develop the Feeda product together with my team. I use the following technologies on the project: Python, Django REST Framework, PostgreSQL, ORM, Git, GitHub, Docker.
